MATERIAL SAFETY DATA SHEET

SECTION 1: PRODUCT IDENTIFICATION

NAME: Methoxy Polyethylene Glycol Derivative Item Number / Product Name HO-PEG8-NH2/ Hydroxyl PEG8 Amine, MW 369.5 HO-PEG12-NH2/ Hydroxyl PEG12 Amine, MW 545.8

CAS No.: 25322-68-3 Molecular Weight: Average Molecular Weight 369.5 Da, 545.8 Da Chemical Formula: Not applicable to mixtures.

JENKEM TECHNOLOGY CO., LTD.

FIRE EXTINGUISHING MEDIA: SPECIAL INFORMATION:

Water spray, dry chemical, alcohol foam, or carbon dioxide. In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Remove all sources of ignition. Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in section 8.

Solid Spills: Clean up spills in a manner that does not disperse dust into the air. Use non-sparking tools and equipment. Reduce airborne dust and prevent scattering by moistening with water. Pick up spill for recovery or disposal and place in a closed container.

Liquid Spills: Absorb with vermiculite, dry sand, earth or similar material and place in a chemical waste container. Do not use combustible materials, such as saw dust. Do not flush to sewer.

SECTION 7: HANDLING AND STORAGE

Keep in a tightly closed container filled with nitrogen or argon, stored in a cool, dry, ventilated area. Store at -20°C for long time storage. Protect against physical damage. When sample is withdrawn, product should be warmed up slowly to room temperature and then opened to avoid moisture. After sample is withdrawn, the bottle containing the product should be filled again with nitrogen or argon. Product should always be kept away from light.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

AIRBORNE EXPOSURE LIMITS:

AIHA Workplace Environmental Exposure Level (WEEL): Polypropylene glycols: 8-hour TWA: 10 mg/m3, as an aerosol

VENTILATION SYSTEM:

A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, *Industrial Ventilation*, *A Manual of Recommended Practices*, most recent edition, for details.

PERSONAL RESPIRATORS (NIOSH APPROVED):

For use with solids (not required for liquids): If the exposure limit is exceeded and engineering controls are not feasible, a half facepiece particulate respirator (NIOSH type N95 or better filters) may be worn for up to ten times the exposure limit or the maximum use concentration specified by the appropriate regulatory agency or respirator supplier, whichever is lowest. A full-face piece particulate respirator (NIOSH type N100 filters) may be worn up to 50 times the exposure limit, or the maximum use concentration specified by the appropriate regulatory agency, or respirator supplier, whichever is lowest. If oil particles (e.g.lubricants, cutting fluids, glycerine, etc.) are present, use a NIOSH type R or P filter. For emergencies or instances where the exposure levels are not known, use a full-facepiece positive-pressure, air-supplied respirator. WARNING: Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.

SKIN PROTECTION:	Wear protective gloves and clean body-covering clothing.
EYE PROTECTION:	Use chemical safety goggles. Maintain eye wash fountain and quick-drench
	facilities in work area.

SECTION 10: STABILITY AND REACTIVITY

STABILITY: HAZARDOUS DECOMPOSITION PR	Stable under ordinary conditions of use and storage. ODUCTS:
HAZARDOUS POLYMERIZATION:	Carbon dioxide and carbon monoxide may form when heated to decomposition. Will not occur.
INCOMPATIBILITIES:	Incompatible with polymerization catalysts (peroxides, persulfates) and
CONDITIONS TO AVOID:	accelerators, strong oxidizers, strong bases and strong acids. Incompatibles.

SECTION 11: TOXICOLOGICAL INFORMATION

Oral Rat LD50 for:

PEG 200 = 28gm/kg; PEG 300 = 27.5gm/kg; PEG 400 = 30.2gm/kg; PEG 600 = 30gm/kg; PEG 1000 = 32gm/kg; PEG 1450 = > 4gm/kg; PEG 4000 = 50gm/kg; PEG 6000 = > 50gm/kg; PEG 20000 = 31.6gm/kg Polyethylene glycol has been investigated as a mutagen; PEG 1000 has been investigated as a tumorigen.

SECTION 13: DISPOSAL CONSIDERATIONS

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste disposal facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.
