

JenKem Technology

JenKem Technology now offers chromatographically purified linear PEG amine products with high purity ($\geq 95\%$ by GFC)

**CHROMATOGRAPHICALLY
PURIFIED LINEAR AMINE
PEG PRODUCTS**

Chromatographically purified (CP) linear PEG amines are low in reactive impurities, which ensures the best purity profile for your downstream products

Examples of products are listed below, and other products with MW 1kDa-50kDa can be made-to-order
